- Test Requirement** :
- (1) As specified by customer, 242 Substances in the Candidate List of Very High Concern (SVHC) screening are performed according to European Chemicals Agency (ECHA) on and before Nov 7, 2024 regarding Regulation (EC) No.1907/2006 concerning the REACH.)
 - (2) As specified by customer, 1 potential Substances of Very High Concern (SVHC) in the identification ongoing.
 - (3) As specified by customer, 6 potential Substances in the Public Consultation List of potential Substances of Very High Concern (SVHC) screening are performed according to European Chemicals Agency (ECHA) regarding Regulation (EC) No.1907/2006 concerning the REACH.
 - (4) As specified by customer, 7 potential Substances in the Intention List of Very High Concern (SVHC) screening are performed according to European Chemicals Agency (ECHA) regarding Regulation (EC) No.1907/2006 concerning the REACH.

REACH obligation :

Concerning article(s):

Communication:

Article 33 of Regulation (EC) No 1907/2006 requires supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance in the Candidate List.

Notification:

In accordance with Regulation(EC)No 1907/2006, any EU producer or importer of articles shall notify ECHA, in accordance with paragraph 4 of Article 7, if a substance meets the criteria in Article 57 and is identified in accordance with Article 59(1) of the Regulation, if (a) the substance in the Candidate List is present in those articles in quantities totaling over one tone per producer or importer per year; and (b) the substance in the Candidate List is present in those articles above a concentration of 0.1% weight by weight (w/w).

Starting from January 5, 2021, companies supplying high concern substances (SVHC) with concentrations higher than 0.1% by weight (w/w) on the candidate list in the EU market must comply with the requirements of the Waste Framework Directive 2008/98/EC and submit SCIP notifications to ECHA regarding these substances.

Concerning material(s):

Test results in this report are based on the tested sample. This report refers to testing result of tested sample submitted as homogenous material(s). In case such material is being used to compose an article, the results indicated in this report may not represent SVHC concentration in such article. If this report refers to testing result of composite material group by equal weight proportion, the material in each composite test group may come from more than one article.

If the sample is a substance or mixture, and it directly exports to EU, client has the obligation to comply with the supply chain communication obligation under Article 31 of Regulation (EC)No. 1907/2006 and the conditions of Authorization of substance of very high concern included in the Annex XIV of the Regulation (EC)No.1907/2006.

Concerning substance and preparation:

If a SVHC is found over 0.1% (w/w) and/or the specific concentration limit which is set in Regulation (EC) No 1272/2008 and its amendments, client is suggested to prepare a Safety Data Sheet (SDS) against the SVHC to comply with the supply chain communication obligation under Regulation(EC)No 1907/2006, in which:

- a substance that is classified as hazardous under the CLP Regulation(EC)No 1272/2008.
- a mixture that is classified as hazardous under the CLP Regulation (EC)No 1272/2008, when it contains a substance with concentration equal to, or greater than the classification limit as set in Regulation (EC)No.1272/2008; or
- a mixture is not classified as hazardous under the CLP Regulation (EC)No 1272/2008, but contains either:
 - (a) a substance posing human health or environmental hazards in an individual concentration of $\geq 1\%$ by weight for mixtures that are solid or liquids (i.e., non-gaseous mixtures) or $\geq 0.2\%$ by volume for gaseous mixtures; or
 - (b) a substance that is PBT, or vPvB in an individual concentration of $\geq 0.1\%$ by weight for mixtures that are solid or liquids (i.e., non-gaseous mixtures); or
 - (c) a substance on the SVHC candidate list (for reasons other than those listed above), in an individual concentration of $\geq 0.1\%$ by weight for non-gaseous mixtures; or
 - (d) a substance for which there are Europe-wide workplace exposure limits
